

LIGHTEN YOUR BUSINESS ENERGY COSTS

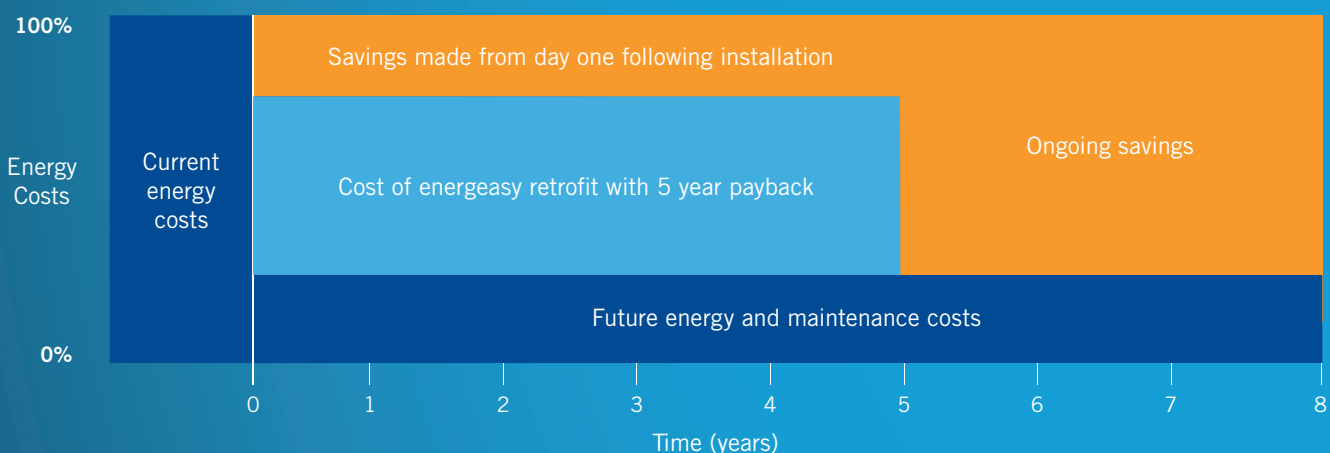

START SAVING FROM SMARTER LIGHTING SOLUTIONS TODAY

LED's are one of today's most energy-efficient lighting technologies lasting up to 6 times longer than traditional office lighting. By completing an energy efficient lighting retrofit programme your business could save up to 80% in electricity costs* every year.

An investment in good quality LED lighting will pay for itself with a quick payback period of around 1-4 years. When you combine this with finance in partnership with DLL as part of our Energieasy Retrofit programme you could have a positive cash flow from day one.

OUR SERVICES INCLUDE:

- > ENERGY AUDIT
- > LIGHTING DESIGN
- > SUPPLY OF PRODUCTS
- > COMPLETE INSTALLATION
- > PROJECT MANAGEMENT
- > COMPETITIVE FINANCE

HOW IT WILL WORK FOR YOU

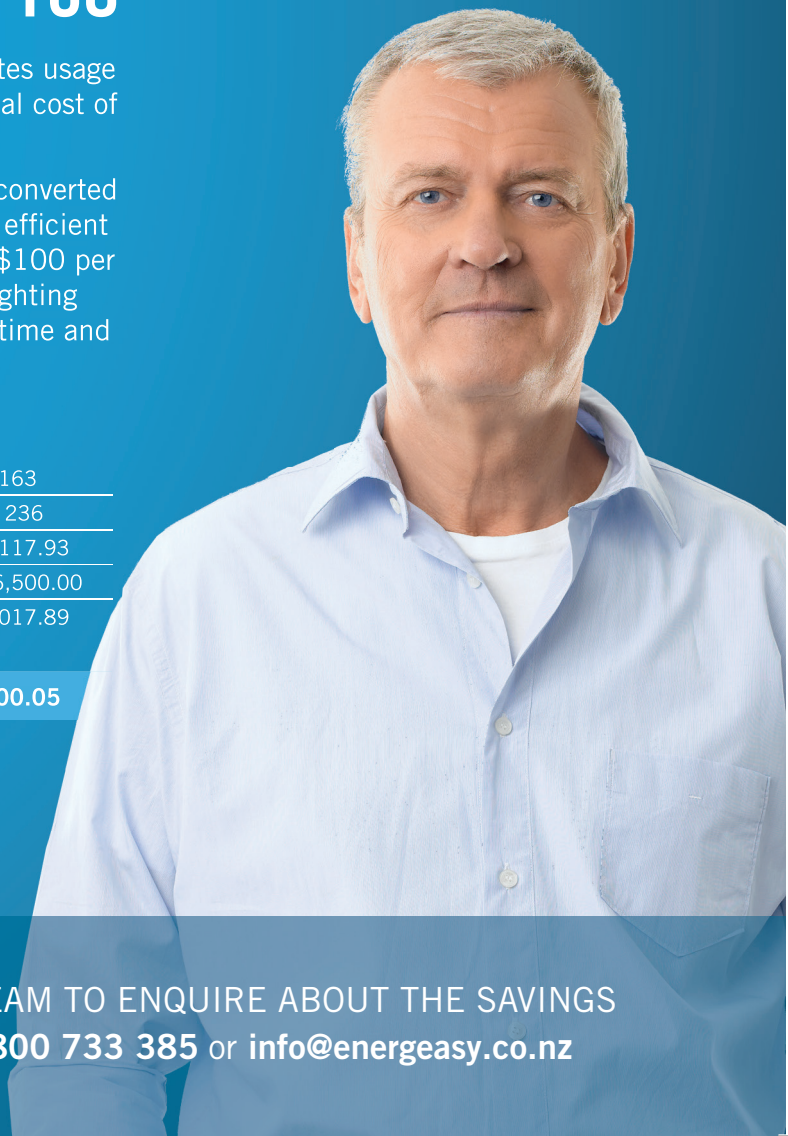

A business with normal highbay fittings accumulates usage of just over 10,000 kWh and might expect a capital cost of \$45,000 to upgrade their lighting.

With Energeasy Retrofit a capital expense can be converted to operating expense making the retrofit of energy efficient lighting easy. You could benefit from a savings of \$100 per month from day one, what's more, because LED lighting lasts so much longer you no longer need to waste time and money changing lamps!

EXISTING FITTINGS

A	KW Hours Per Month	10,163
B	Electrical Running Cost Per month (Ax.22)	\$2, 236
C	Running Costs Per Month with new lighting (B* .5)	\$1,117.93
D	Cost of new fittings including installation	\$46,500.00
E	Cost of finance new fittings and installation per month (Dx.02189)	\$1,017.89
Savings per month from day 1 (B-C-E)		\$100.05
