- Maintained operation.
- Replaceable easy fit, quick release decals.
- 24M viewing distance.
- High temperature Nickel Metal Hydride battery.
- Total power consumption 2.3W.
- Dali Version available.

Environmental Consequences of Cadmium

NiCd batteries contain cadmium, which is a toxic heavy metal and requires special care during battery disposal.

The sale of nickel-cadmium batteries has now been banned within the European Union except specialist used including emergency lighting.

Under the same EU directive, used industrial nickel-cadmium batteries must be collected by their producers in order to be recycled in dedicated facilities.

Cadmium, being a heavy metal, can cause substantial pollution when landfilled or incinerated.

All Ektor products are Cadmium free.
